Oppose 210966 !!!

Ordinance 210966 is anti-Cyclist & regressively anti-Cyclist safety.

Over decades now, I have frequently taken both Gillham & Armour
by both automobile & Bicycle on my commute from Brookside to
Crown Center & the West Bottoms.
1/ Gillham had long been one of this city's most dangerous roads
for commuting cyclists, but NOW we have a safe route to ride
between Brookside & Crown Center/Downtown.
2/ Gillham & Armour are still safe & convenient to use
when I take my car. And lane usage is better labeled.
+++++++
If we're to be a modern city, if we're to reduce our Carbon Plume,
if we're to compete competently with other urban economies,
then we're going to need to respect the value of human-powered
transportation & it's right to the road.
If KC's Light-Rail & it's Buses can recognise the value of bicycles
to our city's transportation needs, why shouldn't our City Council?

Respectfully,
Calvert Guthrie
CC District 4
