I am writing in support of the plan to install protected bicycle lanes along Cleaver II from Troost to Main. These should be curb stop and bollard protected, and not parking protected. Parking Protected while creating a barrier, creates other problems because that barrier is too opaque thus causing sight line issues for both drivers and bicycle users.
I support the connecting of the Gilham Cycletrack with the Trolley Track and feel the best way to do this is to install a bicycle lane along Oak from Cleaver II to 51st st
