---

On July 28th of this year, I was hit by a car while riding my bike to work. I was not at fault when it happened at the intersection of Linwood and Baltimore. I spent two nights in the hospital and the next 14 weeks in a cervical collar due to a broken neck. I would have ridden in a bike lane if available.
I oppose any ordinance that would reduce or impair progress made in the areas of bicycling and walking safety in Kansas City Missouri.
