As a physician who has treated both adults and children in the ICU with complications from COVID-19 as well as someone who cares for this community deeply, please consider extending the mask mandate. Without a doubt, personal freedoms, beliefs, and customs are incredibly important but this is a matter of caring for our community as a whole. It is a small sacrifice to protect the most vulnerable of us. It is a small sacrifice to prevent the sacrifice and loss too many of our community has already had to endure. Again, I implore you to support extending the mask mandate.

Dr. Melissa Doan, M.D.
