Dear City Council,
I think that bike lanes serve an important need in the community for safe transportation. I think its as important as the street car in making our city a more liveable place. I live at 3430 Charlotte St, Kansas City, MO 64109, just a few feet away from the protected bike lanes. My wife and I use them ALL THE TIME. I now see entire families using them- with kids and all. I ALWAYS run across other cyclists on the Gilham bike lanes now. People are going to school and work- I know that they arent just for spandex clad racers. They really are making my neighborhood feel more friendly and connected. Our city is on the cusp of becoming a welcoming community because of all the transportation alternatives that are becoming a reality.
Please oppose 210966. A walkable, rideable city is PROGRESS.

Thank you for your time,
Chuong Doan
