Hi,

I'm against the addition of all districts to the Ordinance 210966. I support Councilwoman Robinson in her goal to focus on the needs and priorities of her district but I'm concerned that requiring approval from each district for bike infrastructure planning will make it very challenging, nearly impossible, to create useful bike lanes. Bike lanes are most useful when they span several districts; enabling commuters to truly use bikes as an alternative to cars.

Thanks,
Kat Townsend
