

Dear Chairman O'Neill, Vice Chairwoman Robinson, and Councilmembers Bunch, Duncan and French,

I have attached the Climate Protection Steering Committee's recommendation regarding Ordinance 230891. The Committee voted yesterday to **not** endorse the Ordinance, for reasons outlined in the attached document.

I regret that the CPSC did not have the opportunity to work more collaboratively with KC Water on this issue and hope the City will consider including us earlier in the process if there is a need to diverge from what is in the City's Climate Protection and Resiliency Plan.

Please feel free to call me if you have questions or need any additional information.

Respectfully,  
Robin Ganahl  
Chair, Kansas City Climate Protection Steering Committee
