Is it good for the children?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

How will this contribute to a sustainable Kansas City?	<p>This project consists of public and private improvements for a 4 lot commercial development, on approximately 3.5 acres of previously undeveloped property. These facilities will reduce the overall storm water volume and attenuate the peak runoff rate to less than existing conditions. The private open space will also retain much of the existing natural vegetation and natural waterways. Runoff from within the development will be conveyed in an enclosed storm sewer system and released into the detention facilities. through a covenant agreement. Modern and safe, walkable streets with sidewalks, curb and gutter and street lights will be constructed. New sanitary sewers will be constructed that will minimize infiltration and inflow within the system conveyed to the treatment facility. Homeowners must adhere to the codes, covenants and restrictions prepared for the project to assure ongoing maintenance and upkeep of their personal residences and common properties. This development will increase the tax base for the developed lots and will provide ample permanent greenspace within the development.</p> <p>Written by Thomas Holloway</p>
