Discussion

The construction of housing on undeveloped land in south Kansas City will advance economic development in the region and provide benefits to the entire metro area. Kenneth Road requires road repaving and water and sewer line improvements. The repair and improvement of Kenneth Road in South Kansas City near the Loch Lloyd neighborhood will facilitate and complement new residential development in the area. The design and construction of improvements to Kenneth Road has been studied and developed to near final design. Implementation of a Certified Permitting Program by the City's Planning Department improves plan review efficiency to achieve permit approvals within days while maintaining compliance with adopted building, zoning, and development codes. Funding for the project requires an appropriation from Water and Sewer Funds for water and sewer line improvements on Kenneth Road. The City desires to provide funding for improvements to Kenneth Road and in turn to achieve the benefit of and commitment of Loch Lloyd Inc. to development further residential homes in South Kansas City.
