

Marilyn Sanders,

In regard to Ordinance Number 200463 which authorizes a one-year contract between the Convention Center and Green Wave Technology, Harvest Productions fully supports the decision to move forward with this ordinance. We support this because in addition to being a co-vendor of Greenwave at the Kansas City Convention Center, we have also engaged their services directly. Mark and his team provide excellent customer service. Greenwave truly cares about the success and safety of each guest. In addition to great service, they give back to the community by providing donations to non-profit organizations. They are part of the Convention Center Family. We support Ordinance Number 200463 which authorizes a one-year contract between the Convention Center and Green Wave Technology.

We respectfully hope you will consider the request to extend Greenwave's contract,

Greg Turcotte
