## Docket Memo

Ordinance/Resolution #: 260349

Submitted Department/Preparer: Health

Revised 12/03/25

Docket memos are required on all ordinances initiated by a Department Director. More information can be found in [Administrative Regulation \(AR\) 4-1](#).

### Executive Summary

Accepting and approving a grant award amendment from the Centers of Disease Control and Prevention to provide additional funding to assist in workforce development and meeting public health foundational capabilities in the Kansas City, Missouri area; estimating and appropriating the additional sum of \$739,567.00 in the Health Grants Fund for a total amount of \$9,306,095.00; and recognizing this ordinance as having an accelerated effective date.

### Discussion

The annual appropriation of A2 Public Health Infrastructure grant funding allows the health department to either continue funding, or begin funding, 15 core public health activities which otherwise would lack a funding mechanism. Public Health in Missouri is funded to the lowest per capita in the country at roughly \$7 per person across the state, and this CDC project is dedicated to supporting the basic public health infrastructure and core public health activities as needed by local and state public health agencies. This funding will allow for us to improve our laboratory capacity, retain nurses, train our staff, improve our meeting spaces, and modernize our data systems to ensure that as an agency we are as prepared as possible to meet the many demands placed upon Public Health in the current environment

## Service Level Impacts

Acceptance of this funding will allow for several programs to ensure continued levels of service delivery. Our Community Wellness Ambassador program is fully funded through this mechanism and would be without support otherwise. We have a mechanism to fund staff training to ensure that our employees are up to date with current best practices in Public Health. We have also sourced funding to assist in the acquisition of a new Electronic Health Record system which will directly increase our ability to effectively deliver public health services to the community
