LAND SURVEYING - LAND PLANNING - CIVIL ENGINEERING 201 NW 72ND STREET - GLADSTONE, MISSOURI 64118 Phone: 436-0732 - Fax: 436-0767 Date: April 16, 2007 Job No: 43580

themes. These guidelines are meant to achieve a cohesive look for the development of the three lots.

- Each tenant is encouraged to design within the parameters set forth in the criteria to blend with the development.
- Lot 4A design will be subject to the Boulevard and Parkway Standards outlined in Chapter 88.

Materials

- The exterior finish material on all facades that face a street or provide public access from parking lot should be constructed of high-quality materials such as glass, brick, marble, real or cast stone, coarsely textured stucco, or enhanced concrete panels.
- Enhanced Concrete panels must incorporate casting of facing brick into the surface to give the appearance of a masonry wall or similar high finish applications with city approval.

Colors

- The predominant colors of building exteriors shall be compatible with the colors of adjacent buildings in character with the surrounding area, generally providing a complimentary diversity. Colors in the earth tone palette are encouraged. Trim is encouraged to be of a contrasting color.

Façade

- Buildings with multiple storefronts shall use architecturally compatible materials, colors, details, awnings, signage, and lighting fixtures to create complementary character.
- Rooftop screening will be provided to protect against adjacent viewing per Section 88.

Glass/Window

- Glass shall be clear or lightly tinted only. Sliding doors and sliding windows and overhead doors are permitted.

Roofs

- All rooftop equipment shall be enclosed in building material that matches the structure or is visually compatible with the structure.
- Parapets may be appropriate pending design review.

Site Design

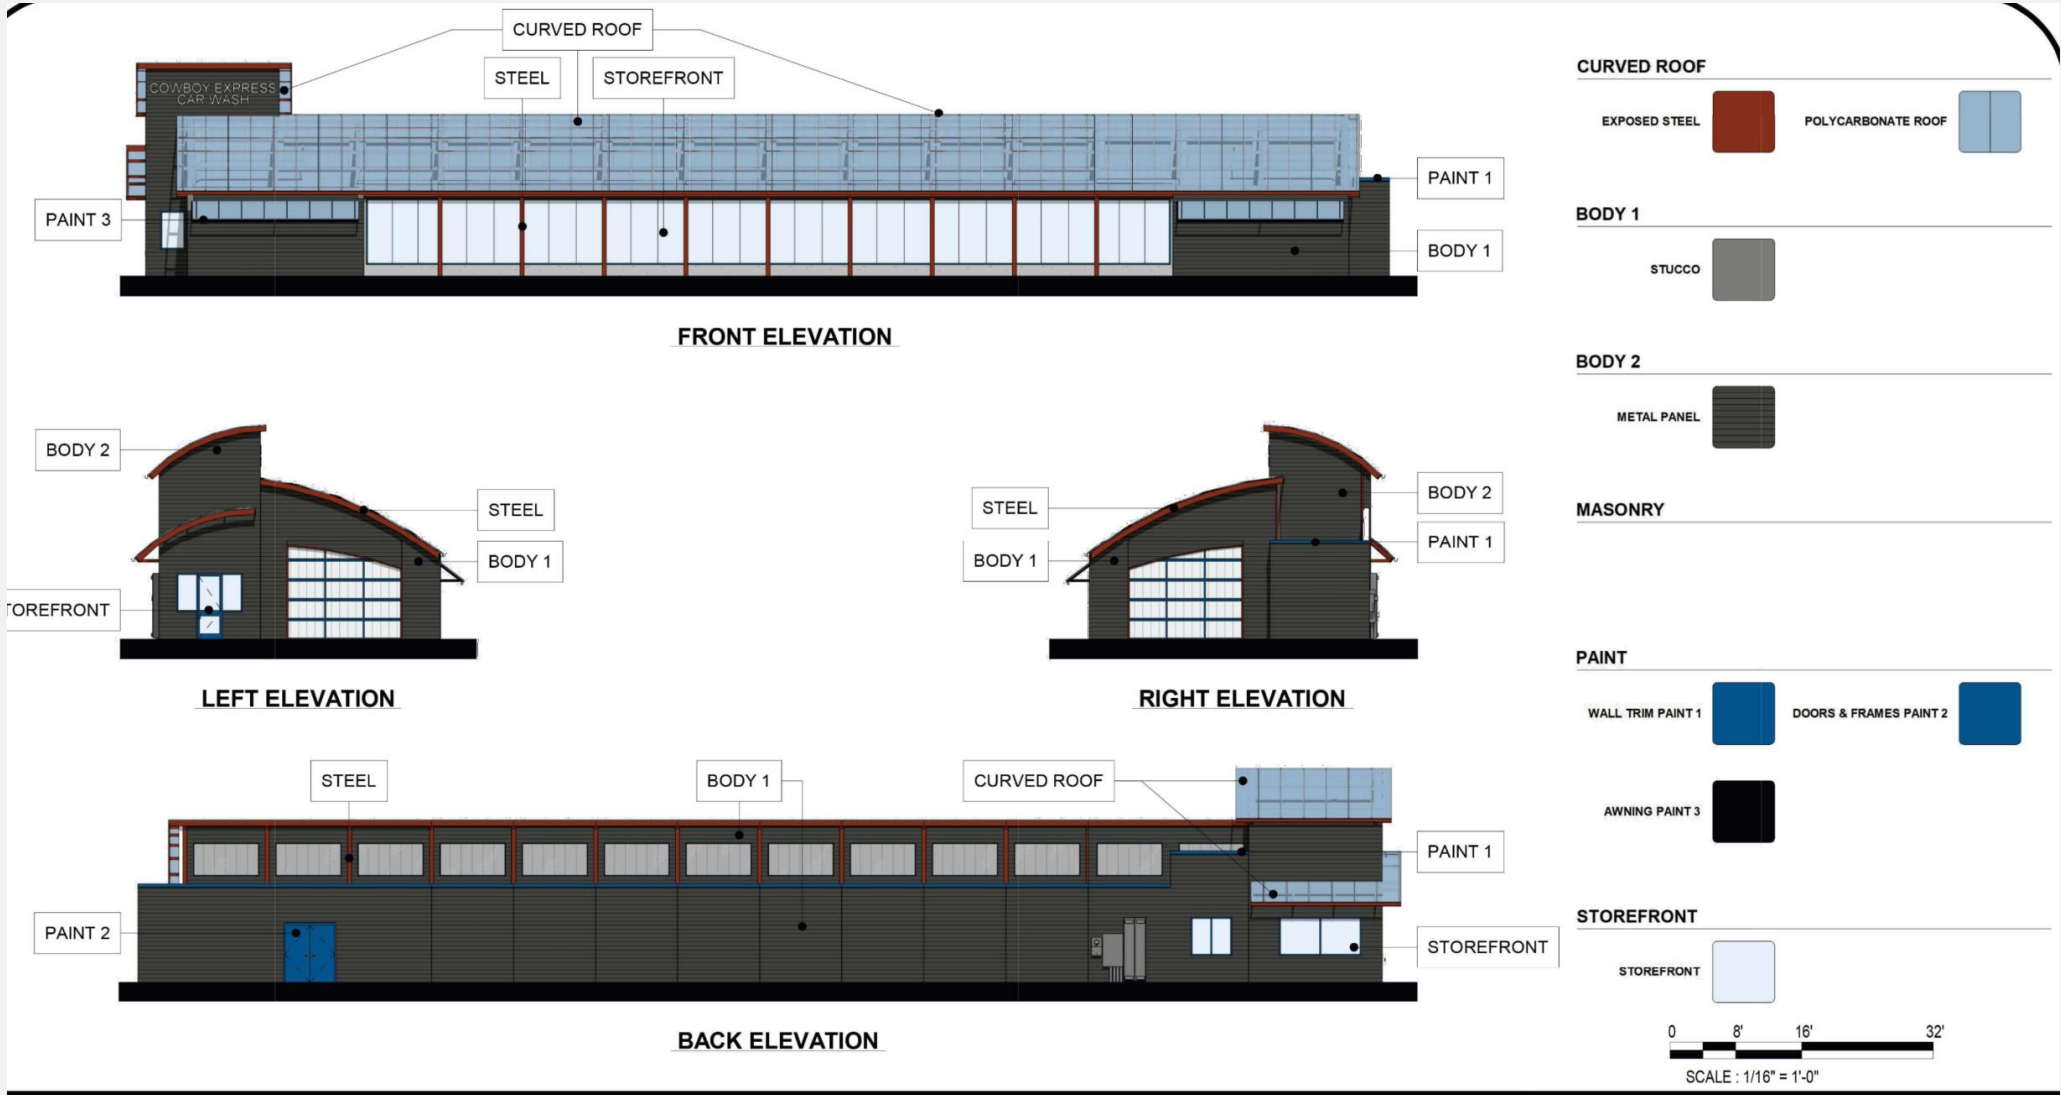

- The site shall provide a pedestrian friendly environment, including measures for safety and ease of movement between streets and buildings, across parking lots, and between buildings via designated and clearly defined pedestrian routes which may include raised walkways, pattern

Drive Through Guidelines

- Any sites using a drive through option should provide functional and safe traffic, pedestrian, and bicycle movement.
- Provide safe vehicle stacking lane and site access placement, ideally on the interior side of the site or screened with a porte cochere.
- Safe and accessible pedestrian connections to the building from both public and private realms should be provided.
- If drive-through lanes are visible from public or private ROW, they shall be screened with berms and landscaping, or 3 foot tall masonry wall, or porte cochere.

c. COMMUNITY GUIDELINES

- Building and parking lot design shall comply with applicable ADA accessibility requirements.
- Sidewalks shall be of a minimum width as required by code.
- Landscape areas may be placed adjacent to the building wall or adjacent to the curb to coordinate with building overhangs, awnings, and canopies.
- Pedestrian walkways will be provided, to the extent practical, within parking areas, between parking aisles to provide a connection to the primary entrance of the building served by the parking area. Walkways shall be wide enough to accommodate adequate room for vehicle bumper overhang over the curb. Parking areas should be designed to focus on safe and efficient pedestrian circulation.
- Streetlights shall be designed to complement the character of the community and conform to all applicable standards.
- Streets and sites shall be provided with adequate lighting.
- Bike Racks will be provided where appropriate and for long- and short-term bicycle parking per Chapter 88.
- Design aspects as per Chapter 88 shall be provided and adhered to, including street trees, bicycle parking, etc.
