Subject: In support of Green Wave Technology

Hello,

Green Wave Technology has been able to support every need for our city wide convention, that brings over 14,000 people and an 18 million dollar economic impact to our beautiful city. Mark and his staff have been incredibly helpful and made our event feel like it is not just another event in the building. They take the time to understand our event and provide solutions that are very cost effective to our nonprofit's bottom line.

United Soccer Coaches is a local association that host events in Philadelphia, Baltimore, Chicago, and Anaheim and the Green Wave staff is by far the most helpful, cost effective, and friendliest company we work with for internet and electrical. In addition, I have had ZERO complaints from our exhibitors about the service and the transparency provided by Green Wave. Exhibitors are the life blood of any association Convention and we strive to constantly make the exhibitors happy. This is one of the reasons why we choose to bring our event to KC.

Green Wave Technology has my highest recommendation for the in-house technology provider in the KC Convention Center.

Please contact me if you have any questions or would like to discuss Green Wave further.

Geoff
