Service Level Impacts

Ryan White Part B Services ensure that low income residents living with HIV have support through Medical Case Management, Linkage to Care, and Referral for Healthcare support services to navigate health systems, educate, and address barriers to care. Impacts on public health from Ryan White program can be seen in both unmet need (indicating 2 HIV medical care visits each year) and Viral Load Suppression for those engaged vs not engaged with the Ryan White Program. In the KC-TGA of those enrolled in Ryan White services 8.1% had an unmet need and 11.8% were not virally suppressed compared to the overall population of persons with HIV in the jurisdiction with 19.9% unmet need and 27.7% not virally suppressed (SOURCE CY20 Surveillance data). When individuals with HIV are virally suppressed they are unable to transmit HIV to others and thus the Ryan White programs also protect the community by preventing the spread of HIV.

Other Impacts

1. What will be the potential health impacts to any affected groups?

Impact to overall persons living with HIV will include better health outcomes as described above and improved quality of life. Populations disproportionately impacted by the HIV epidemic include men who have sex with men, men and women of color, transgender women, and intravenous drug users.

2. How have those groups been engaged and involved in the development of this ordinance?

The Kansas City- TGA has an active Integrated HIV Prevention and Care Planning Council composed of various stakeholders in the community including 33% of the membership persons living with HIV, including members of the groups described above. Planning Council makes decisions on appropriations and is provided ongoing reporting from KCHD to monitor progress and effectiveness of the funded services.

3. How does this legislation contribute to a sustainable Kansas City?
