Hi — trans/non-binary people of all ages, shapes, sizes, genders, etc. have enriched my life for the better and deserve to receive gender-affirming care. The suicide rate for those who do not reach this care is too damn high. They are people first and need to be treated like such, not a politicized entity! They wouldn't deny others treatment for breast cancer, hormones for those without a uterus or testicles, thyroid treatment, or viagra, so why are we denying trans/non-binary folks?
