

KC TIF Watch

Points to ponder prior to voting on Ordinance 211016

1. SB Friedman has indicated that this project could be done in 10 years – so why should we be willing to give them an extra 5 years at 30%?
2. Why is a garage necessary when there are approximately 3,750 unoccupied spaces in two garages nearby and the site is on the streetcar track?
3. Where do most of the employees live and shop – in KC, MO or across state line?
4. Is there an opportunity for new hires (who should be KC, MO residents)?
5. How many of the employees have children who attend KCPS schools, including charter schools and community colleges within KCMO?
6. Many of the residents in the surrounding neighborhoods oppose this project are they being heard?
7. Why are we continuing to subsidize projects in prime areas instead of lifting up our distressed areas?

Please carefully consider this project. KC TIF Watch urges you to vote no.
