How will this contribute to a sustainable Kansas City?	<p>This project consists of public and private improvements for a residential development on a previously undeveloped site to create a multi-family subdivision. The proposed development will significantly increase the area of impervious surfaces. The peak rate of storm water discharge and total runoff volume will be maintained after development. Water quality treatment will be provided with onsite BMP's. The development will improve the aesthetics of the site and increase the tax base for the City.</p> <p>Written by Lucas Kaspar, PE</p>
