To whom it may concern on the city Council:

I am a property owner on the 3500 block of Central Street. I have 26 unit apartment buildings and I provide one parking space for each of the 12 units behind the building. The street parking is already over used and there is never room for it Guess who visit my tenants today. The Mac proposal will exacerbate that problem severely and I urge you to continue the project approval process until Mac has addressed the parking issue and agreed to provide more parking spaces within the outline of their building. Thank you very much
