Chair O'Neill, and Committee Members,
I am writing to ask you to support Ord 230613, the updated Pedestrian, Cyclist, and Vehicular Traffic Safety plan.

We are halfway through the year and just recorded our 48th traffic related fatality within KCMO city limits. This puts us on pace to once again pass 90 traffic related fatalities this year. This is more than many comparable cities see in traffic fatalities and murders combined. Kansas City doesn't have much control over guns and crime due to state pre-emption, but we do have control over our roads and you can do something about all the deaths and injuries on our roads. Crashes aren't inevitable, they are preventable.

Please vote yes on 230613
